DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Acknowledgments

2. Acknowledgment is made of the IDS's filed 2/15/02 and 5/10/02 and the preliminary amendment filed 2/15/02.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1-3 and 5-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakanishi (6,450,459 B2).

Nakanishi discloses a vehicle conductive fuel and brake pipe clamp 1 comprised of a conductive synthetic resin for coupling the fuel feed and return pipes in parallel (which conventionally extend between an engine and fuel tank) and the brake lines in parallel, as shown in figures 1-5 and recited in column 2, lines 33-37.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nakanishi, as applied to claim 1, and in further view of In re Aller, 105 USPQ 233 (CCPA 1955).

Nakanishi does not disclose the resin as being carbon black. The use of a specific material is not patentable unless it produces an unexpected result, see In re Aller, 105 USPQ 233 (CCPA 1955). Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to have used carbon black to make the clamp in order to achieve a desired strength and resistance to temperature.

Conclusion

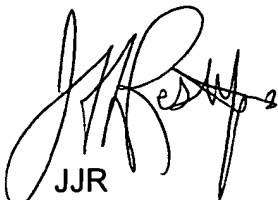

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Saotome et al., Saito, Schliessner, Marion, Kujawski, Gordon, Kraus, Calabrese et al., Battie et al., Cau et al., Denndou, Oi et al., Maruyama, and Kanie et al. all disclose pipe clamps of interest.
